

products.

The strong attendance of architects, developers, and interior specialists further emphasised the importance of DOMOTEX Middle East as a destination for sourcing innovative solutions aligned with the region's ambitious development projects.

Sonia Wedell-Castellano, Global Director of DOMOTEX at Deutsche Messe AG, commented: "The success of DOMOTEX Middle East 2025 reflects not only the vibrancy of the global flooring market but also Dubai's pivotal role as a centre for international business and design.

This platform has enabled meaningful connections, inspired new ideas, and celebrated the craftsmanship and innovation that continue to drive our industry forward.

We are excited to carry this momentum into DOMOTEX Hannover, where the global flooring community will once again come together to shape the future of the sector."

A hallmark of this year's event was its strong emphasis on heritage craftsmanship, with handmade carpets capturing significant attention across the exhibition floor.

Visitors were drawn to rare and large-format silk pieces that reflected the skill and tradition of master weavers alongside notable technical

advancements that pushed the boundaries of artisanal production. Sustainability was also a key focus, with exhibitors showcasing a range of innovative solutions designed to reduce environmental impact, promote circularity and align with the growing demand for eco-conscious materials in flooring design.

Kim Koning, Marketing Manager at Condor Group said: "As a first-time exhibitor at DOMOTEX Middle East, we are pleased with the high level of interest in our collections and the quality of conversations we've had. This event has been a valuable gateway for Condor Group to introduce our European-designed flooring solutions to the GCC market.

We were especially pleased to welcome a diverse range of visitors from around the world, which highlights the show's strong international reach.

It has been rewarding to share our values with a region that clearly appreciates forward-thinking design and responsible manufacturing."

Laurent Messara, Managing Director at Messara Trading said: "DOMOTEX Middle East 2025 was an outstanding experience. The strong participation from across the GCC and beyond allowed us to present our latest designs and sustainable flooring solutions to a highly engaged audience.

The connections we made and the insights we gained are invaluable as we continue to innovate and deliver quality to our clients worldwide."

Building on the success of DOMOTEX Middle East 2025, DOMOTEX Hannover 2026, taking place from 19 to 22 January 2026, will continue to offer the global flooring and interior finishing industry a unique opportunity to connect, collaborate and drive forward the next wave of innovation and growth.

The DOMOTEX brand stands apart as the only truly international trade fair for flooring and interior finishing, with established editions held in Shanghai, Hannover, and Dubai.

This global presence makes DOMOTEX a unique and dynamic platform where industry professionals from around the world come together to connect, share knowledge, and explore the latest innovations.

The cross-continental reach of the DOMOTEX network ensures that it reflects regional market trends while fostering global collaboration and setting industry benchmarks.

DOMOTEX Middle East 2025 Has Successfully Concluded

DOMOTEX Middle East 2025 has successfully concluded at the Dubai World Trade Centre, reaffirming its status as a leading international platform for innovation, craftsmanship, and collaboration within the global flooring industry. Over three days, the event attracted

manufacturers, designers, buyers, and industry leaders from around the world, highlighting Dubai's growing influence as a hub for trade and design excellence. With 100 exhibitors representing key markets across Europe, Asia, and the Middle East, the exhibition showcased

a diverse range of flooring solutions. From luxurious handmade carpets and bespoke designs to cutting-edge sustainable materials and advanced technologies, the displays reflected the industry's evolving priorities and the region's demand for premium, designed, and environmentally conscious

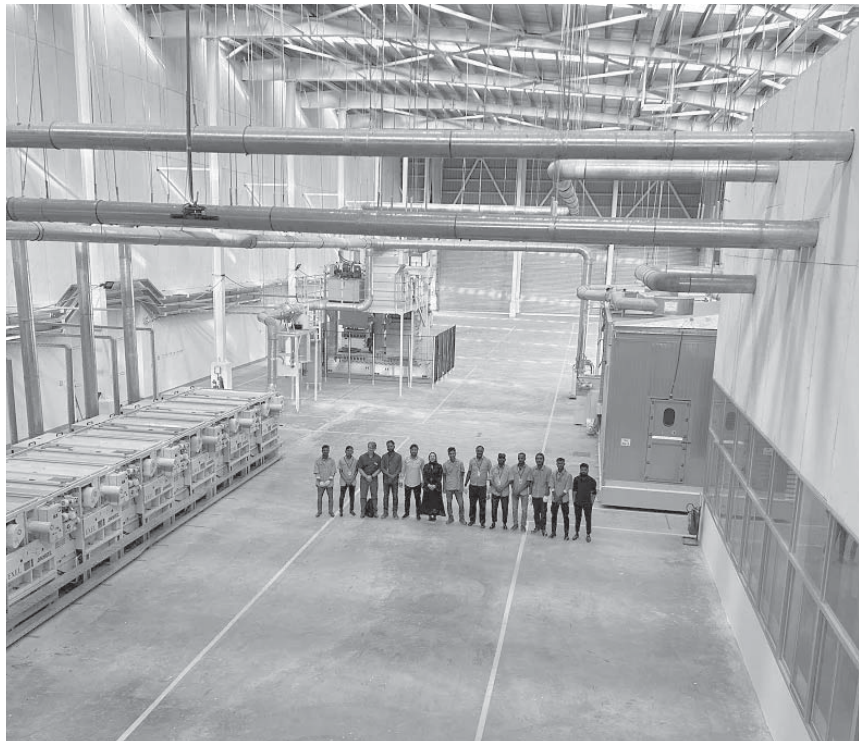

Andritz technology boosts circular textile production at Pacific Jeans

Insights

Pacific Jeans in Chattogram, Bangladesh, has commissioned an Andritz reXline tearing system to recycle post-industrial textile waste. With a capacity of 800 kg per hour, the system enables the company to produce sustainable fibres for new jeans, reducing carbon footprint and production costs while promoting circularity in the fashion industry. International technology group ANDRITZ has supplied and commissioned a reXline tearing system for Pacific Jeans in Chattogram, Bangladesh.

This system marks a significant step forward in the recycling of post-industrial textile waste for sustainable clothing production.

The ANDRITZ tearing line enables Pacific Jeans to recycle waste generated during the cutting process of jeans production. With a capacity of up to 800 kg of fiber per hour, the line gives a second life to large volumes of manufacturing waste, allowing the company to supply the spinning industry with high-quality sustainable fibers. The yarn produced from these fibers is used by Pacific Jeans to manufacture new jeans, fostering circularity in its production process. Compared to virgin cotton, the use of recycled fibers significantly reduces the carbon footprint and lowers costs in

clothing production.

“It has been a pleasure to work with ANDRITZ on this reXline installation, which helps us to build our responsible supply chain,” said Syed M. Tanvir, Managing Director of Pacific Jeans. “Bangladesh’s dynamic clothing industry has great potential for post-industrial waste recycling. By transforming our cutting waste and reusing this recycled fiber in fabric production, we aim to close the loop and move the fashion industry towards a greener future.”

Founded in Bangladesh in 1984, Pacific Jeans Group is a global leader in the production of sustainable premium jeans. The group is committed to driving positive change through innovation, circularity, and sustainability to achieve net-zero climate impact.
